

## **Guidelines in choosing your implant size**

1. Get a bra in the size that you wish to attain. eg: Cup B,C,D,E
2. Fill water in a plastic bag & put it into the bra as you wear it, adjust the water volume to the desire size.
3. Look at the mirror whether the size is satisfied (big enough or fill up to own likeness).
4. Pour out the water into a measuring cup or jar to see how many cc's it is.
5. Patient might want to reference the below sizes to choose.

Everyone will have slight differences in their body. One side can be bigger then the other or lower then the other. When there is much difference from one to another, a different size for each breast would be recommended.

Here are the sizes Dr. Danny Oh Siew Leng carries in the clinic.
